RITA GATHONI

AI Evaluation & Quality Specialist | LLM Evaluation | Agentic AI | Data Validation

+254701477688 | ritaroheni@gmail.com | LinkedIn | Nairobi, Kenya

SUMMARY

AI Evaluation and Data Quality Specialist experienced in assessing large language model outputs, browser-based AI agents, prompts and structured data. Skilled in factuality, reasoning, instruction adherence, hallucination detection, rubric-based scoring, safety review, JSON/schema validation and tool-use assessment. Combine rigorous human judgement with Python, SQL and spreadsheet checks to produce reproducible findings, actionable feedback and dependable training data. Background in financial controls and data operations.

CORE SKILLS

- **LLM & Generative AI Evaluation:** Response ranking, preference evaluation, factuality, reasoning, instruction following, hallucination detection, safety, multimodal assessment and human-in-the-loop review.
- **Prompt Testing & Agentic AI:** Prompt stress testing, multi-turn tasks, browser-agent evaluation, navigation and interaction checks, function calling, tool-use review, edge cases and failure analysis.
- **Structured Data & Quality Assurance:** JSON, JSON Schema, field-level checks, conditional logic, metadata alignment, benchmark/gold-set QA, calibration, audit trails and data integrity.
- **Programming & Analysis:** Python, SQL, Excel, Google Sheets, regex, PivotTables, automated validation checks, dashboards and anomaly investigation.
- **Research & Remote Delivery:** Evidence verification, claim checking, evaluation rationales, guideline refinement, Jira, Confluence, Slack, Google Workspace, and U.K./U.S. English conventions.

PROFESSIONAL EXPERIENCE

Turing Inc. Enterprises **Sep 2025 - Sep 2026**

LLM Evaluation Domain Expert | AI Quality, Prompt Testing & Structured Outputs - Remote *Palo Alto, California*

- Evaluated 400+ text, multimodal and structured LLM outputs weekly for factual accuracy, reasoning, instruction adherence, safety, clarity and downstream usability.
- Maintained approximately 97% evaluation quality while meeting high-volume review and turnaround requirements across evolving project guidelines.
- Assessed browser-based AI agents for navigation, interface interaction, efficiency, task completion and output quality; checked claims against screenshots and reliable sources.
- Stress-tested prompts, multi-turn scenarios and edge cases to expose hallucinations, logical gaps, incorrect tool choices and function-call errors.
- Validated JSON, nested fields and schema conditions with Python, SQL and spreadsheet checks, improving repetitive validation efficiency by approximately 20%.
- Reviewed verifier criteria to distinguish genuine model failures from faulty evaluation checks; documented traceable rationales, failure patterns and escalation decisions.
- Contributed calibration examples and rubric refinements, supporting an estimated 15% improvement in reviewer consistency on recurring patterns.
- Collaborated with project managers and quality leads to refine rubrics, benchmark sets, test coverage and escalation guidance.
- Reviewed English-language outputs for clarity, grammar, tone and naturalness across U.K. and U.S. usage conventions.

Invisible Technologies **Jan 2024 - Dec 2024**

LLM Evaluation Specialist | Response Evaluation & AI Data Quality - Remote, Part-time *Nairobi, Kenya*

Concurrent with other roles (including Fairmont)

- Reviewed approximately 300-400 AI-generated items weekly for factuality, reasoning, instruction following, safety, usefulness and structured-output compliance.
- Used scoring rubrics and response preferences to evaluate multi-step and ambiguous assignments, achieving approximately 96% reviewer acceptance.
- Detected fabricated claims, misleading confidence, inconsistent fields and policy concerns; documented recurring issues and recommended corrections.
- Checked U.K. and U.S. English grammar, tone and naturalness; supplied written evaluator rationales and calibration feedback.
- Maintained approximately 98% on-time completion across remote task batches and changing evaluation guidelines.
- Validated structured responses against task rules and expected schemas, documenting formatting and field-level defects.
- Turned guideline gaps and recurring errors into evaluator rationales and calibration feedback for consistent scoring.

iMerit **Jan 2025 - Dec 2025**

AI Model Evaluator | LLM Quality Assurance & Data Validation - Remote *Nairobi, Kenya*

Concurrent with other roles (including Fairmont and Turing)

- Evaluated 250+ AI outputs weekly for factuality, logical consistency, relevance, clarity, safety and instruction compliance, maintaining approximately 95% evaluation accuracy.
- Ranked competing model responses using structured criteria, evidence checks and concise written justifications.
- Flagged hallucinations, misinformation, bias, unsafe outputs and difficult edge cases; escalated unclear requirements rather than making assumptions.
- Produced traceable feedback and contributed recurring-error findings to reviewer calibration and model-quality workflows.
- Worked asynchronously with evaluators and quality leads to communicate review decisions, identify repeat defects and meet deadlines.

Fairmont Mount Kenya Safari Club **Jan 2023 - Sep 2025**

Data & Operations Analyst | Financial Controls, Data Quality & Reporting - Onsite *Nairobi, Kenya*

- Reviewed financial and operational datasets, invoices, purchase orders, supplier records and system entries for accuracy, completeness and internal control compliance.
- Investigated source-to-system discrepancies, reducing unresolved reconciliation follow-ups by approximately 20%.
- Created spreadsheet trackers, variance summaries and audit documentation to improve exception visibility and first-pass record quality.
- Coordinated with procurement, stores and operations to resolve anomalies, supporting an estimated 15% improvement in reconciliation efficiency.
- Handled confidential supplier and payment information, supporting month-end checks and maintaining audit-ready records.

NCBA Bank PLC **Jan 2022 - Dec 2022**

Junior Retail Credit Analyst | Retail Lending & Credit Risk - Onsite *Nairobi, Kenya*

- Supported retail credit application reviews, verifying applicant records, income documents and repayment capacity against lending requirements.
- Checked affordability and credit information, documented exceptions and referred higher-risk cases to senior credit analysts.
- Maintained accurate, confidential application records and flagged missing or inconsistent documentation before credit decisions.

ROHENI Originals **Nov 2024 - Present**

Founder & CEO | Circular Fashion, Operations & Business Development - Part-time *Nairobi, Kenya*

- Founded a Kenya-based circular-fashion venture developing small-batch outerwear from reclaimed denim, leather, cowhide and textile offcuts.
- Lead creative direction, sustainable material sourcing, sampling, artisan coordination, production oversight and supplier negotiations.
- Built expense, pricing and sales trackers to support financial controls, fundraising due diligence and evidence-led growth planning.
- Secured $11,250 in competitive grant and pitch funding, presenting the venture's business model, sustainability goals and growth plans.
- Developed a distinctive product direction centred on extending material life and working with local makers to refine garment quality.

EDUCATION

Glasgow Caledonian University / African Leadership University **Sep 2018 - Feb 2022**

BA (Hons), Business Management - Glasgow Caledonian University *Mauritius*

Second Class Upper | Studied at African Leadership University, Mauritius

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- ALU Advantage Leadership Certificate - African Leadership University, Mauritius (2018-2022)
- Generative AI with Large Language Models - DeepLearning.AI
- Prompt Engineering for Developers - DeepLearning.AI
- Advanced RAG Evaluation - DeepLearning.AI
- LLM Course - Hugging Face
- PCEP Python Programmer - Python Institute
- Certified Public Accountant, Sections 1 and 2 - NIBS Technical College

LANGUAGES & REMOTE READINESS

- English: Professional command of U.K. and U.S. conventions; experienced assessing tone, clarity, grammar and audience fit.
- Swahili/Kiswahili: Professional proficiency. Nairobi-based and available for international remote AI evaluation work.
